

Long-Range Facilities Task Force April 9, 2013

Strengths of this meeting:

- Very informative.
- Looking forward to getting down to specifics.
- Enjoyed this meeting. It feels like we're talking more about the facilities & thinking outside the box as a group.
- Liked the challenge → Still need to articulate our goal/charge w/the dilemma we are facing → design innovative facilities in a climate of greying demographic.
- Need to discuss guiding principles.
- Linda's ideas need more time to discuss → good topic for more creativity (and) thoughtful discussions.
- Always thought provoking conversation.
- We got to the "grit" of our charge; I felt more discussion on facilities was going somewhere.
- Explanation of Elementary School Closings.
- I need to know what has been promised to the community in the past 10 years.
- Great treats!

Comments/Suggestions for Improvement:

- Ask Nolan! ☺
- Lots of data, lots of decisions to make – lots to think about!
- Put agenda out ahead of time.
- It would be nice to have initial "quote" emailed to us so we could have time to ponder & have thoughtful discussion.
- Last question: I wonder if 'Banding' at elementary level offers more collaboration/innovation than k-6?
- It would be nice if the "Thought provoking question" could be given to us ahead of time so we can think about it prior to the meeting.
- Please encourage attendees not to wear cologne/perfume.
- It was hot in here.
- Some comments appear to be "more heard" from group than others.
- Listen to all w/equal ear ☺.
- None.
- Needed more time on Report discussion.
- Reminder about side conversations – please limit.
