

**Long Range Facilities Task Force
October 22, 2013**

Strengths of this workshop:

- Lots of information to consider.
- Interesting presentations.
- Best meeting so far.
- Starts and ends on time – good pacing, good presentations.
- Every voice was heard.
- Food
- Pacing of meeting.
- Concise
- Presentations were high quality, well thought out.
- Get new High School as priority!! Next steps after that are only left to figure out.
(A suggested strategy submitted should this be the Task Force decision.)

Comments/Suggestions for improvement:

- Not all presentations researched based.
- Lack of focus on what is best for students.
- Guiding principles?
- I like combining small learning communities within a given school configuration.
- Still would like to see the Task Force adopt guiding principles prior to any recommendation to the School Board.
- I'm not convinced building a high school is a good idea. While several seem to support it; the idea does not seem supported by research or data.
- This should have been done the 4th meeting of this Task Force.
